

LABELS INSPECTION AND SLITTER REWINDER
SMART ECO

Labels Inspection and Slitter Rewinder

SMART ECO

Machine designed for inspection, slitting and rewinding labels, paper and plastic film. It features automatic stop by length or diameter. Quick stop system places the detected defect right on the splicing table before slitting array.

PROCESS

- Unwinding system with a 3" cantilevered expansion shaft.
- Automatic alignment system.
- Inspection and splicing table .
- Razor slitters, 5 pieces included.
- Rewinding configuration with one or two stations depending on the material being processed.

TECHNICAL SPECIFICATIONS

- Unwinder diameter: 760 mm(29.92").
- Rewinder diameter: 432 mm (17")
- Width: 330 mm (13") and 450 mm (17.71").
- Maximum slitting and rewinding speed: 350 m/min (1,148 ft/min).
- Maximum speed with vision system: 250 m/min (820 ft/min).

OPTIONAL

- 6" expansion shaft for unwinder.
- Strobe.
- Dimatra inspection system with camera (accumulator required).
- Modem for remote troubleshooting.
- Web accumulator to display defects on the inspection table.
- Shear slitting system

SERVICES

- After-sales service.
- Technical support.
- Spare parts sales.
