

# LABELS INSPECTION AND SLITTER REWINDER

# Labels inspection and slitter rewinder.

Machine designed for inspection, slitting and rewinding labels at high speed. Quick stop system places the detected defect right on the splicing table before slitting array. This machine operates with cellophane, PET, PE, PVC, BOPP, CPP, BOPA, PP and laminated products.

## FEATURES

- Unwinder and rewinder by expansion shaft.
- Automatic alignment system.
- Razor slitters, 5 pieces included.
- Independent transmission for each rewinder shaft.
- Stop by label count, meters processed or diameter.

## SPECIFICATIONS

- Unwinder diameter: 760 mm (29.92") and 1,000 mm (39.37").
- Width: 330 mm (13"), 450 mm (17.71") and 600 mm (23.62").
- Rewinder diameter: 432 mm (17") and 600 mm (23.62").
- Speed:
  - Up to 500 m/min (1,640 ft/min) slitting, optional 250 m/min (825 ft/min).
  - Up to 360 m/min (990 ft/min) inspection, optional 250 m/min (825 ft/min).

## OPTIONAL

- Adapters and expansion shafts for other diameters.
- Second rewinding shaft
- Differential rewinding shafts.
- Double rubber density lay-on roller.
- Web accumulator.
- 2nd manual splice table for inspection system.
- External adjustment for slitting system.
- Shear slitting system.
- Defective material rewinder.
- Roll lift.
- Trim slit and extraction.
- Strobe.
- Anti-static bars.
- Inspection system.
- Modem for remote troubleshooting.
- "Workflow".

## SERVICES

- After sales service.
- Technical support.
- Spare parts sales.
