

SHRINKING SLEEVE
ECO SEAMER

Shrinking Sleeve ECO SEAMER

Converting machine to seam shrinking sleeves. **Compact design machine, easy to operate.**

Operates with a wide range of plastic films such as PVC, PET, PETG, OPS and PLA.

PROCESS

- Unwinder with a 3" inflatable shaft.
- Heat shrinkable sleeve forming system by wheels and paddles.
- Rewind system with a oscilating movement.
- Rewind system with a 3" inflatable shaft.

TECHNICAL SPECIFICATIONS

- Unwind diameter: 400 mm (15.75").
- Rewind diameter: 320 mm (12.5").
- Maximum width of layflat sleeve: 200 mm (7.87").
- Minimum width of layflat sleeve: 50 mm (1.97").
- Speed: 120 m/min (393.70 ft/min).

OPTIONALS

- Longitudinal perforating system.
- UV lamp and adhesive application sensor.
- Adapters for different core diameter in unwinder and winder.
- Magnifying glass for visual inspection of the adhesive application.
- Antistatic bars.
- Remote connection for fast troubleshooting.

SERVICES

- After-sales service.
- Technical support.
- Spare parts sales.
